

ShadowSec

Incident Detection Report — Explainable Intrusion Detection System

Report ID	1
Generated For	Kajendhiran
Dataset	shadowsec_dataset.csv
Date / Time (UTC)	2026-06-19 03:50:51

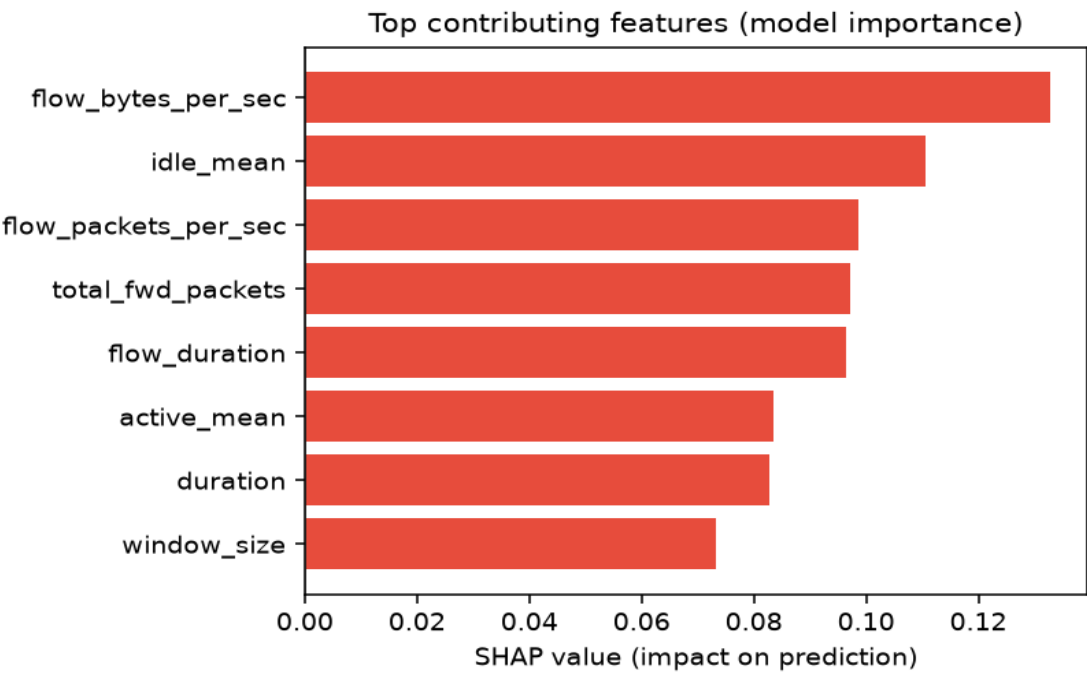

Detection Summary

Attack Type	Botnet
Model Confidence	100.0%
Severity	Critical
Risk Score	1000 / 1000
Risk Category	Critical
Detection Time	229.8 ms

Explainable AI — Why This Was Flagged

Botnet was detected primarily due to: High Byte Rate, Irregular Idle-Time Pattern, High Packet Rate, and High Packet Volume.

- High Byte Rate
- Irregular Idle-Time Pattern
- High Packet Rate
- High Packet Volume

Security Recommendations

- Isolate the affected host from the network immediately.
- Run a full endpoint malware scan.
- Investigate command-and-control (C2) traffic and block known C2 domains/IPs.
- Rotate credentials that may have been exposed on the host.
